| 200000/10 | A randomised, double-blind, double dummy, multicentre study to compare the efficacy, safety and tolerability of intravenous Gemifloxacin (SB26805) followed by oral Gemifloxacin versus intravenous Ceftriaxone plus Erythromycin followed by oral Cefuroxime plus Clarithromycin in the treatment of hospitalised adult patients with community-acquired pneumonia (CAP) |  | CHL | GSK                  | ROBERT HEMMER R.    | Phase IV             |
| 200000/09 | Amprenavir (141W94) open label study for subjects with HIV infection who are failing or are intolerant to previous protease inhibitor therapy                                                                                                                                                                                                                             |  | CHL | GSK                  | ROBERT HEMMER R.    | Phase IV             |
| 200000/08 | A long-term, open label, non-comparative study to evaluate the safety of 0,03% Tacrolimus (FK506) ointment and 0,1 % Takrolimus (FK506) ointment for treatment of atopic dermatitis in paediatric patients                                                                                                                                                                |  | CHL | FUJISAWA GMBH        | KARINE DESPONTIN K. | Autre étude clinique |
| 200000/07 | A randomized, open-label, multicenter study evaluating the efficacy and safety of the combination therapy of Peginterferon alfa 2a (Ro25-8310) with Ribavirin (Ro20-9963) versus combination therapy of Interferon alfa-2a (Roferon-A) with Ribavirine in naïve or relapse patients with chronic Hepatitis C                                                              |  | CHL | ROCHE                | GUY WEBER G.        | Phase III            |
| 200000/06 | A randomised phase III multicenter trial of Neoadjuvant Docetaxel (Taxotere) plus Cisplatin plus 5-Fluorouracil versus Neoadjuvant Cisplatin plus 5-Fluorouracil in patients with locally advanced inoperable squamous cell carcinoma on the head and neck.                                                                                                               |  | CHL | RHONE POULENC        | GUY BERCHEM         | Phase III            |
| 200000/05 | Le Linezolid IV/PO comparé à la vancomycine dans le traitement des infections documentées ou suspectées par staphylococcus sp. Methicilline-résistant                                                                                                                                                                                                                     |  | CHL | PHARMACIA            | ROBERT HEMMER R.    | Phase III            |
| 200000/03 | A study to assess long-term antiviral activity, safety, including serum lipids, and tolerability of BMS-232632 in combination with Stavudine (d4T) and Lamivudine (3TC) in subjects previously treated with NFV or BMS-232632                                                                                                                                             |  | CHL | BRISTOL-MYERS SQUIBB | ROBERT HEMMER R.    | Phase III            |
| 200000/02 | Evaluation of the safety and antiviral efficacy of a novel HIV-1 protease inhibitor, BMS-232632, in combination with D4t and 3TC as compared to a reference combination regimen                                                                                                                                                                                           |  | CHL | BRISTOL-MYERS SQUIBB | ROBERT HEMMER R.    | Phase II             |
